## **Distributed Energy Road Show**

Distributed Energy Resources...The Power of Choice

Next Stop: Anchorage on December 11 & 12!

## The U.S. Department of Energy's Distributed Energy Road Show is coming to you!

We're traveling across the nation to help streamline siting and permitting processes for new distributed energy technologies and we're headed to your area!

The City of Anchorage Building Department and the U.S. Department of Energy are co-hosting two Road Shows in Anchorage, Alaska. Participants will learn the ropes of installing, operating, and interconnecting these new technologies from the experts — technology manufacturers and distributors, fuel experts, and state and local offices for energy and the environment. Discussions will focus on local siting, code, and permitting issues; fuel production and storage safety; and the utilization of excess heat from distributed energy units for facility heating and cooling needs (combined heat and power). Participants will receive hands-on training with fuel cells, microturbines, natural gas-fired reciprocating engines, and more.

Come "kick the tires" on the latest energy technologies for your business, home, or facility! Registration is free!

Thursday, December 11, 2003, 8:00am - 4:00pm -OR-

Friday, December 12, 2003, 8:00am - 4:00pm

City of Anchorage Building Department 4700 S. Bragaw Street Anchorage, AK 99507
